EDUCATION

Government College of Technology

Bachelor of Computer Science and Engineering | **CGPA: 8.00**

Coimbatore, Tamil Nadu, India

Oct 2022 – May 2026

Adhiyaman Matric Higher Secondary School

Class XII | **Percentage: 93.83%**

Krishnagiri, Tamil Nadu, India

June 2020 – May 2021

TECHNICAL SKILLS

Languages: Java, PHP, Python, SQL, C, JavaScript, HTML, CSS

Databases: MySQL, MongoDB, PostgreSQL, Supabase

AI / ML: Knowledge Graphs, Vector Embeddings, Graph RAG, LSTM, B-Trees

Frameworks & Libraries: React, Bootstrap, WebRTC, Knuckles, Chart.js

Tools: IntelliJ, VSCode, GitHub, Jupyter, Google Colab

EXPERIENCE

Nuvai AI Solutions Pvt Ltd | *AI Engineer Intern*

Dec 2025 – July 2026 | On-Site

Certificate

- Designed a **YAML-to-Knowledge Graph** pipeline mapping hierarchical configurations as nodes and edges, preserving structural context for **Graph RAG** and AI retrieval workflows.
- Built a **vector embedding pipeline** for graph nodes enabling **semantic search**, replacing keyword-based retrieval; integrated **Knuckles framework** for AI pipeline orchestration.
- Architected **hybrid indexing** using **B-Tree** for low-latency metadata lookups and **LSTM-based contextual storage** to model sequential data relationships.

Emglitz Technologies | *Java Intern*

July 2025 – July 2025 | On-Site

Certificate

- Developed a **Password Generator desktop app** in Java with **Java Swing GUI**, supporting customizable password options, history saving, dark mode, and pronounceable password generation.

Coincent | *Web Development Intern*

April 2024 – June 2024 | Remote

Certificate

- Built a **Real-Time Chat Application** with responsive front-end using **HTML, CSS, JavaScript, Bootstrap** and scalable **Java** backend with database integration for live messaging and real-time data updates.

PROJECTS

Stock Inventory Management | *PHP 8.3, MySQL, Bootstrap 5.3, Chart.js*

GitHub

- Built a production-deployed full-stack inventory system with **role-based access** (Admin/Staff), **ACID-safe** Purchase & Sales management, per-product low-stock alerts, **SKU support**, and Category & Supplier CRUD.
- Developed **analytics dashboard** with 3 live **Chart.js** charts (revenue, stock distribution, units-sold), Reports module with **date-range filters & CSV export**, and real-time low-stock navbar badge.
- Secured with **bcrypt**, **CSRF tokens**, **prepared statements** (SQL injection safe), session regeneration.

Real-Time Chat Application | *PHP, JavaScript, Supabase, WebRTC, HTML, CSS*

GitHub

- Built a **WhatsApp-inspired full-stack chat app** with **PHP** backend, **Supabase (PostgreSQL)**, **WebSocket** channels, **WebRTC** voice & video calling, and **17+ REST APIs** for messaging, file uploads, emoji reactions, and typing indicators.
- Secured with **bcrypt**, **CSRF tokens**, rate limiting; supports voice messages, offline queue, browser notifications, link previews, and message search.
